

Electric Vehicle Charging

We remove the complexity of EV charging stations for commercial properties.

About Us

AstroLabs Innovations enables commercial property owners to modernize their properties with fully managed EV charging solutions – without the cost, complexity, or operational burden traditionally associated with EV charging stations.

To simplify the process for property owners, AstroLabs provides turnkey EV Charging plans that include procurement, installation, station monitoring, maintenance, repair, driver support, signage, and ongoing operational management – **often at no cost to the property owner.**
