

Become an AstroLabs Installation Partner

We remove the complexity of EV charging stations for electrical contractors.

More Info:

About Us

AstroLabs Innovations partners with commercial electrical contractors to expand their service offerings with turnkey EV charging solutions – providing the technology, network, and ongoing operational support while partners focus on installation.

AstroLabs helps installation partners support their commercial customers' EV charging needs with a turnkey solution. Bring AstroLabs into the conversation when customers are exploring EV charging, and join our network of preferred installation partners for future commercial projects in your service area.
